

THE CLIMAX

Will fill your silo in less time and with less expense and trouble than any other cutter requiring the same power.

WHY?

Because it is the simplest and most perfect cutter on the market; has great durability and requires a minimum of repairs.

We call your attention to the following features:—

- The thin, straight, flat knives solidly bolted to the carefully machined knife seats.
- Simple and positive adjustments.
- The inward shear cut.
- The convenient mounting, having broad wheel base and low feed table.
- The lever close to the operator, to start, stop, or reverse in a moment.
- Feed opening about the shape of a large bundle of corn. No band cutting or spreading necessary.
- Strong and simple pipe connections, the three elbows and the perfect distributor.
- It cuts and elevates at one operation; not two. The motion of the corn is not arrested between the wagon and the silo.
- Can be set up in fifteen minutes.
- No litter. No waste.
- Can be belted from either end.

Each machine equipped with pipe for a 36-foot silo, including three elbows and a distributor.

NO EXTRAS TO BUY

	Capacity in Tons per Hour	Horse Power Required
Climax H, Steel Frame,	15 - 25	10 - 12
